AIR QUALITY

The quality of the air people breathe indoors directly impacts their health and well-being and constitutes one of the most important aspects of healthy buildings. Good air quality can help prevent asthma, allergy symptoms, and keep breathing easy during the colder months. Highlands Sports Complex uses state-of-the-art air quality monitoring as part of its RESET Air to provide the best indoor environment for high-performance athletics.

PRACTICAL TIPS TO IMPROVE INDOOR AIR QUALITY

1. Keep your space clean: Good indoor hygiene can greatly cut down on dust and possible allergens.
2. Invest in an air purifier: These devices can help capture some of the irritants that trigger allergens.
